

Computing and Technology Report 2024

This small group met 9 times during 2024. We have 12 members on the list, which is the maximum my lounge can sensibly accommodate. On average we have 8 at our monthly meetings.

We covered a broad range of topics during the year, from favourite phone apps to the Post Office IT Scandal, via electric cars and the risks and benefits of online banking. Some sessions have been spent helping each other sort out malfunctioning phones & tablets.

Whilst we don't have a formal, structured programme, at the end of each meeting we normally agree upon a topic for the next one. This informal approach seems to work well for this group – we normally have no problems filling the 2-hour time slot!

Stephen Bishop
