

# Apple Apps Report 2025

We are in the third year of the new format of the group which continues to take a non technical approach to sharing information and experience between us on various categories of Apple Apps for the iPhone, iPad and Apple Computers.

We saw another new operating system introduced in 2025 – iOS 26, which we looked at in a bit of detail having explored the functionality of iOS 18 earlier in the year.

We continue to meet on Zoom and that works well for demonstrating the software on the phone or iPad more easily than meeting in person. It also helps when the group leader is away travelling as the group can continue to meet regularly.

We've looked at the following areas of interest this year:

- Artificial Intelligence (ChatGPT, Gemini)
- WhatsApp
- Messages
- Navigation
- iCloud

All suggestions for future topics are welcome as are new members. Thanks to the regular attendees of the group for making it enjoyable to facilitate.

Philip Lawson  
Group Leader  
November 2025
