Wine Appreciation Group 2 Report 2026

We will be having our first meeting for some time later this month. In that meeting we will obviously be appreciating wine but also I will try to find ways round two problems that we have been facing - transport to and from the meetings, and communication.

As members of the group come from all over the Caterham district they need to travel to and from the meetings. It is possible to drink well below the legal and your personal limit but many people, quite sensibly, do not want to take the risk. That leaves public transport and taxis. Public transport will involve too much time and walking for many people.

I understand Wine Appreciation Group 1 have well organised taxi-sharing. That is something that we will look at at our next meeting.

The other problem that the group has been facing is communication. For the meetings I have been sending out emails from my personal email and via Beacon but I still get replies from only half the people in the group. We will look at that problem at our next meeting.
